PSI Repair Services To Showcase Cost-Saving Services At WINDPOWER 2013

PSI Repair Services, Inc.

PSI Repair Services, Leading ISP in the Wind Energy Sector, to Showcase Extensive Range of Cost-Saving Services for Wind Farm O&M Professionals at WINDPOWER 2013 Conference

Combining the best diagnostic equipment in the world with a savvy, solution-oriented engineering services department has catapulted PSI as the top ISP in the wind energy market

Livonia, Michigan – PSI Repair Services, Inc., a subsidiary of Phillips Service Industries, will showcase its extensive range of services to support wind farm operations and maintenance (O&M) professionals at the WINDPOWER 2013 Conference & Exhibition.

As a leading independent service provider (ISP) in the wind energy industry, PSI Repair Services offers component repair and upgrade services for GE, Vestas, Siemens and Clipper wind turbines. PSI covers the critical electronic, hydraulic and precision mechanical components that drive the turbines' pitch and yaw systems and down tower electronics. PSI uses the latest diagnostic tools to detect failures down to the microchip level. Solutions can range from minor repairs to full replacement of printed circuit boards, with enhanced designs to improve performance and reliability. In other cases, PSI can replace inefficient OEM components with newer, more reliable technology or make modification improvements to the original design. PSI also provides comprehensive remanufacturing services for unsalvageable, obsolete components.

"PSI offers more cost-saving services than any other ISP in the wind energy market," said Mike Fitzpatrick, General Manager of PSI Repair Services, Inc. "Our comprehensive failure analysis and engineering services allow wind farm O&M professionals to significantly reduce operating costs on their wind farms by increasing mean time between failures and preventing costly downtime and repeat repairs."

The WINDPOWER 2013 Conference & Exhibition takes place May 6-8 at the McCormick Place Convention Center in Chicago, IL. PSI Repair Services will be exhibiting in Booth 2504. For more information about the WINDPOWER Conference & Exhibition, visit www.windpowerexpo.org [1].
