

The New Bumper Movement

[1]

Doc-Blok International introduces its Dok-Blok®, a bumper made of mining-grade rubber, moves up and down with the trailer on its own suspension, improving standard rubber bumpers that easily damage and tear. With friction and wear virtually eliminated, the Dok-Blok® can last maintenance-free for years. According to the company, features of the Dok-Blok® include:

- Protective qualities and movement of rubber.
- One size that fits most applications, eliminating the need for various sized bumpers.
- Quick and simple installation.
