

Explosion-Proof Motor For Hazardous Waste Compactor

KenBay has added a hazardous waste & explosion-proof model to its line of rotary arm compactors. According to the company, this RotoPac has the same small footprint and high 6-to-1 compaction ratio as its other models, but is now fitted with NEMA 4 boxes for electrical control components and hydraulic valves. With an explosion-proof 5 HP motor, 220/240V 3-phase or 440/480V 3-phase source power requirements, and high quality LED display lights, this industrial compactor is suitable for any Class II Division II environment where both safety and disposal costs are a factor.
