

Flood Light Increases Luminous Flux

The FLAT TEC luminaire fluorescent flood light for machining and industrial plant applications is the latest in the Waldmann Lighting line of products. Available in a built-up (1.65" in height) or flush version, its flat profile helps it fit into tight spaces. The FLAT TEC can be attached directly to the machine wall, incorporating itself into the machine components. It uses T5HO technology to produce a considerably higher luminous flux rate than comparable lamps while requiring significantly fewer luminaires to light large machines or areas, resulting in more light with less energy consumption. It is also IP69K protection class rated (waterproof and pressure jet-tested to 100 bar) and comes with a 10 year warranty.
