

Clamp Down On Corrosion

NewAge® Industries' line of nylon hose clamps now withstand temperatures ranging from -40°F to 302°F (-40°C to 150°C). The Kwik Clamps™ also feature a double row of teeth, designed to ensure a strong bond that will not vibrate loose, and they're made from U.L.-listed, black nylon 6-6, which cannot corrode or rust. No tools are needed for installation and removal.

Kwik Clamps™ are light weight, non-conductive, and can be reused. Over thirty sizes are offered and range from 1/4" through 4-1/4" nominal O.D. They handle moderate non-hydraulic pressure applications, and fittings, tubing, and reinforced hose are available for complete fluid or air transfer systems.
