burn protection. According to the company, when safety apparel is comfortable workers are more likely to wear it as specified, reducing their risk of injury.

GlenGuard®FR is made with Kermel® aramid and modacrylic fibers that are inherently flame and arc flash resistant — characteristics that won't wear off or wash out. The fabrics are color-fast, abrasion-resistant and more environmentally-friendly because no FR chemical finishes are needed. The fabrics have an Oeko-Tex® Standard 100 textile safety certification indicating that they are free from harmful levels of hazardous substances.
