

The Lego V8 Roars

Remember the Lego of your childhood, when you spent countless hours just putting together a space ship or castle that just fell apart after an hour? Well, those days are over. In the 21st century, Lego engineers have moved to bigger and better pastures. Listen to the "roar" of this pushrod V8 as it revs up over 1,500 rpm. I'm feeling a little ashamed I never built anything remotely this cool with my own Lego collection, but then again, I was only eight.
