

The Bionic Cat

Every once in a while, we hear about the revolutionary surgery doctors are performing on people who lose their limbs in an accident. From blade-shaped carbon fiber legs, to prosthetic arms that can respond to signals from the brain, 21st century medicine is proving to be all about bionics. So what happens when a cat gets his hind legs severed by a combine harvester? A veterinarian takes a big risk to develop two bionic legs that allow the little guy to live out the rest of his days like any other cat.
