

InfinityQS, Keops Partner For Global Manufacturing Intelligence

Chantilly, Va. – Nov. 27, 2012 – [InfinityQS International, Inc.](#) [1], a global authority on Manufacturing Intelligence and enterprise quality, today announced a strategic partnership with [Keops Technologies, Inc.](#) [2], a leading industry IT expert focused on integration and deployment of manufacturing operation management systems (MOM) that increase efficiency and improve quality. With offices in Montreal, Madrid and Paris, and recent expansion in Dubai, Keops has formalized its partnership with InfinityQS to complement its existing manufacturing solutions with ProFicient, InfinityQS' enterprise quality hub powered by statistical process control (SPC).

Jean Moukhtar, Keops' director of partnership programs, said, "As supply chain quality becomes a growing focus, more of today's manufacturers are expressing the need for real-time quality information supported by SPC capabilities. By partnering with InfinityQS, Keops can offer a comprehensive suite of plant floor software to our customers, complete with an enterprise quality data hub that can increase manufacturing operational efficiencies."

As a trusted InfinityQS partner, Keops serves as a full-service solution provider, reselling, integrating and providing ongoing support for ProFicient for global manufacturing organizations. By relying on Keops, InfinityQS has an additional means for bringing its enterprise quality hub to more international customers and expanding its business.

Michael Hines, OEM and channel sales manager, InfinityQS, said, "One of the top trends in manufacturing today is globalization – companies are seeking ways to involve their suppliers from around the world in their quest for total quality management. With Keops' knowledge of plant floor systems and MES integration, this partnership is an ideal match. Together, InfinityQS and Keops can deliver Manufacturing Intelligence to enterprises across the globe."

ProFicient is a proven enterprise quality hub powered by a centralized SPC analysis engine. With flexible cloud-based or on-premise deployment options, ProFicient enables manufacturers to proactively monitor, analyze and report on Manufacturing Intelligence to improve quality, decrease costs and make more strategic business decisions.

About InfinityQS International, Inc.
