

## Sustainable Bubble Wrap

The Instapak RC45 foam from **Sealed Air** (Danbury, CT) provides users with a plant-based, renewable-content packaging form that is ideal for light-duty packaging applications. The RC45 foam contains 25 percent renewable content in the finished foam, providing a reduction in the use of petroleum-based raw materials. The new formula is compatible with the company's Instapak form packaging systems and provides the same benefits.
