

# Transit Time Flowmeter

Greyline

Accurately measure flow from the outside of metal or plastic pipes. The new **Greyline** (Massena, NY) TTFM 1.0 Transit Time Flowmeter includes clamp-on ultrasonic transducers for easy flow measurement of liquids including water, oils, and chemicals, says the company. The TTFM 1.0 also features an isolated 4-20mA output and relays for flow proportional pulse output and flow rate controls. Field-installation of options is easy with plug-and-play electronics. The TTFM 1.0 operating system detects the new components and adds them to the menu system automatically.
