# New 1 Megawatt Generator

Atlas Copco

Commerce City, Colo. – Atlas Copco introduced its new QAC 1200 1MW generator at Power-Gen International 2013. To expand upon the standard QAC 1MW generator designed for the European market, the QAC 1200 was specifically engineered to U.S. and Canadian specifications. With a wide variety of options, customers can customize the unit based on their situation such as high altitudes or extreme weather conditions. The flexibility of the QAC 1200 makes it ideal for either prime power or critical standby power in the mining, oil and gas, industrial and construction industries, as well as being an excellent rental product.
