

Sophisticated Pressure Transmitters

WIKA (Lawrenceville, GA) introduces the WIKA TRONIC D-10 and C-10 pressure transmitters for industrial applications. The D-10 line is designed to enable communication with a PC over the digital output, and is particularly useful in automation engineering, laboratories, or maintenance shops. The C-10 can be used for hydraulics and pneumatics, mechanical engineering, or general industrial applications.

WIKA has more information about the D-10 and C-10 at www.wika.com [1].
