## Tote Tank Heaters

Omega Engineering (Stamford, CT) has introduced their wrap-around tote tank heaters to fit any tote tank from 1 to 1.2 meters (40 to 48") square. The series comes in heights of 36, 42, or 48" and is made of flexible silicone-impregnated clothing facing and liner. The heaters provide a quick, easy, non-invasive way to warm a product with two heating zones, built-in adjustable thermostats, and built-in high limit thermostats.
