

## Air-Powered Disc Sanders

Dynabrade, Inc. (Clarence, NY) introduces a new series of air-powered vacuum disc sanders. The new tool is effective at removing coatings while capturing contaminants through the vacuum. The sanders are available in 2, 3, 5, and 7" diameters, and the vacuum shroud diverts dust and debris to the vacuum source. The right-angle design features a rubber over-mold to create less vibration. The 2 and 3" models are available in two styles: a self-generated model, in which the tool's exhausted directs contaminants to a portable self-contained vacuum; or a central vacuum model.
