

## Customized, Durable Topcoats

Sherwin-Williams (Cleveland, OH) announces two breathable, low-odor, waterborne polyurethane floor topcoats containing less than 50 g/L of volatile organic compounds. The GP 4408/4409 topcoats can be used over concrete or other existing coatings — anywhere a durable gloss or satin finish is desired. The coatings can be tinted to unlimited custom colors, allowing companies to individualize their facility to their brand. In 24-hour exposure tests, the topcoats showed no effect from a variety of volatile solutions, including 10 percent bleach solution, 25 percent phosphoric acid solution, and a variety of high-strength cleaners.
