

## Magnetic Particle Separator

Bunting Magnetics Co. (Newton, KS) has recently added a redesigned RotoGrate Magnetic Separator to its product line. The RotoGrate is ideal for products with poor flow characteristics and features a powerful motorized grate magnet which will remove ferrous metals from powders and granular products. The RotoGrate is available in food-grade and self-cleaning options, as well as a standard design. Optional features include:

- The ability to transition product flow into the grate housing.
- Removable tube assemblies for easy cleaning.
- Customized designs to fit customer's needs.
