

## Skim Off The Top

Zebra Skimmers Corp. (Cleveland, OH) has expanded its Muscle Coalescer line to include a new model for servicing air compressor condensate. Because many industries are required to treat their compressor condensate before its release into the water table, the new model can help in the separation and removal of contaminant oils. Additional features include:

- An automatic air release valve and de-oiled water exit.
- A reduction of compressor waste up to 98 percent.
- Compatibility with almost any sized compressor.
- A lifetime warranty.

Visit [www.zebraskimmers.com](http://www.zebraskimmers.com) [1] to find out more about the new additions to the Muscle Coalescer line.
