

Efficient Chemical Handling

Almatech (Kamp-Lintfort, Germany) announces the availability of its newest metal pneumatic diaphragm pump for the use in the handling of chemical. The product chambers for the CHEMICOR series have been designed to meet the sensitive needs of chemical handling due to their smooth flow channels and lack of dead spaces. The CHEMICOR pumps are available in three sizes: 20 gpm (AD 20), 40 gpm (AD 32) and 100 gpm (AD 50). The entire series has been built with stainless-steel, precision-cast housing, and diaphragms and ball valves of EPDM and PTFE.
