

Playing Fetch With Magnetics

Industrial Magnetics, Inc. (Boyne City, MI) has added the HDR3045 heavy-duty magnetic retriever to its line of products. The HDR3045 has been designed for retrieving broken drill bits from oil or water wells, but captures metal objects from any wet or dry area that requires large lifting capacity in a small package. The magnet is encased in a stainless steel housing for a long- non-corrosive life. The large lifting lug allows for attachment to chains, rope, slings, or cable. The retriever magnet measures 3" in diameter by 5-3/4" high, weighs approximately 5 lbs., and has a 300 lb. holding value.

For more information, visit Industrial Magnetics online at www.magnetics.com [1].
