

Flexible Safety

Gamewell-FCI (Northford, CT), a subsidiary of Honeywell, has expanded its Flex Series with two fire alarm releasing panels designed to offer flexible control of single- and dual-hazard agent-based suppression or deluge systems. Both panels are listed to UL/ANSI-864 Ninth Edition standards for supplemental fire protection. The GF506R features clean agent, dry chemical, and high-pressure CO2 suppression control capabilities. The GF506D pre-action/deluge panel is suited for areas protected by water-spray or foam-water sprinkler systems. Both panels feature built-in strobe synchronization, seven amps of output power, and programmable input/output capabilities.
