

Harness The Power Of Water

Guardair Corporation (Chicopee, MA) have announced the addition of two new sizes to their HydroForce Power Wash Gun family: 1/2" and 3/8". The HydroForce combines compressed air and water, resulting in an air/water jet stream perfect for heavy-duty cleaning. The power washer is designed to operate on compressed air supplied by either an in-plant or 185 tow-behind compressor, and standard municipal utility water. No external electric- or gasoline-powered pressure units are required. The unit is also hot and cold water capable and has no duty cycle limitations.

Guardair has more information on the HydroForce additions here:
