

## All-Welded Polyester Bagging

**Eaton Corporation** (Cleveland, OH) announced the availability of its new UNIBAG Series Filter Bags, designed using low-cost, environmentally-friendly materials. The bags also feature a molded top ring seal with an all-welded construction of new needlefelt media, which is made from recycled fibers and contains no optical white additives. The UNIRING top seal provides optimum sealing and eliminates bypass, common with snap ring designs, and reduces process system contamination. The UNIBAG is available in both polypropylene and polyester media constructions, designed to fit and seal most industry standard Number 1 (7" x 16") and Number 2 (7" x 32") size bag vessels.

For more information on the UNIBAG, visit [www.eaton.com](http://www.eaton.com) [1].
