

Knives Of Air

The new Long Super Air Knives from **EXAIR** (Cincinnati, OH) produce a laminar sheet of airflow to blowoff, dry, or cool surfaces up to 96". The compact design minimizes compressed air use by combining 40 parts room air to one part compressed air, and is ideal for use on conveyors, according to the company. The high-volume, high-velocity curtain of air is infinitely adjustable, from a gentle blowing to a tough blast of air. The Air Knife is quiet, maintenance-free, and has no moving parts to wear out. Available in 60", 72", 84", and 96" lengths constructed from a choice of aluminum, 303 stainless steel, or 316 stainless steel.
