

## Weld Anywhere

**Goff's Enterprises** (Pewaukee, WI) have designed a portable Weld/Grind Cell that features Goff's weld/spark resistant curtain material, made for demanding industrial environments. The cell is ideal for a welding or grinding process that has just been added to the production line, or when your welding needs must be portable. The middle section is a 31", 14 mil-thick Weldview PVC that meets CP AI-84 standards. The clear plastic helps illuminate the cell interior and blocks harmful UV light for the safety of those around the cell. Welding and grinding fumes can pass through the open top and into the in-plant exhaust system. For additional strength, the frame can be anchored to the floor if required.
