

## Corrosion-Resistant Tubing For Any Application

The Prolite polypropylene tubing from **NewAge Industries** (Southampton, PA) is made from a NSF-61 (National Sanitation Foundation) semi-rigid compound, and can be used in food processing, chemical lines, dispensing equipment, compressed air, and more. Features of the Prolite tubing include:

- Chemical and corrosion resistance, and a low moisture absorption.
- A thermoformable and weldable construction.
- Nine available sizes (1/4" to 1-1/4" O.D.).
- Meeting FDA requirements for food contact surfaces.

To see more information on the Prolite tubing, visit [www.newageindustries.com](http://www.newageindustries.com) [1].
