

## Dimmable LEDs In Harsh Environments

A new dimmable LED power supply from **Foster Transformer** (Cincinnati, OH) features short circuit and overload protection, making it ideal for industrial facilities wishing to control the output of LED lighting. Encapsulated in epoxy and housed in a 304 stainless steel enclosure, the power supply is resistant to dirt, moisture, and corrosive elements. In addition, the power supply can withstand a direct short in excess of 15 days, with no external fusing required.
