

## Intel Brings Brains And Brawn

**GE Intelligent Platforms** (Charlottesville, VA) has announced the CT12 6U CompactPCI single board computer, based on the latest 2.53 GHz Intel Core i7 processor technology. The new Intel chip is designed to deliver high performance with low power consumption and heat dissipation, and is future-proof, allowing for further processor upgrades as new chips become available. Intel's new processor, in addition to up to 8 GBytes of SDRAM, makes the CT12 6U computer an ideal solution for industrial control, testing equipment, or monitoring systems, according to the company. Four Gigabit Ethernet ports, five USB 2.0 ports, and three COM ports allow for maximum connectivity to existing devices and networking solutions.
