

Jib Cranes Get Personal

Gorbel Inc. (Fishers, NY) has expanded its line of G-Force Intelligent Lifting Devices to include the new G-Jib, a redesign of an enclosed track workstation jib crane. The G-Jib utilizes an industrial processor-controlled servo drive system to deliver unmatched lifting precision and speed. Features of the G-Jib include:

- A weight capacity of 330 to 660 pounds.
- Movement that is aligned with the operator, moving as fast or slow as he/she chooses to move, which allows for lifting applications that require high speed at some points and slow, precise movements at others.
- A cold-formed, high-strength enclosed track design to keep rolling surfaces clean.
- A “Float Mode,” which allows operators to apply a very slight amount of force onto the load itself to precisely orient loads with both hands throughout the full stroke range.

Visit www.gorbel.com [1] for more information on the G-Jib.
