

Material Handling Gone 'Extreme'

Creform Corporation (Greer, SC) has built the Extreme Size Car—which can be manufactured in virtually any size—to meet needs in large parts handling. The parts feature an elevated load platform with a solid plastic shelf surface to provide for damage-free handling of sensitive parts. Additional features include:

- A 500 pound load capacity, with eight large diameter swivel casters.
- Cart handles at both sides, which are height adjustable without tools, for operators to steer and push the cart with minimal effort.
- Wheel brakes to secure position during loading or unloading.
- An optional towing hitch or bolt-on AGC unit to convert the car into a rapidly deployed Creform AGV.
