

Slow Down, Man

Deschner (Santa Ana, CA) is now offering the Super-K Kinechek speed regulator, designed for a wide variety of motion control solutions, including robotics, food processing equipment, and packaging machines. The Super-K now comes in a 4" or 6" stroke within a short overall length, and can handle loads up to 1,200 lbs. Other features include:

- A high-pressure cylinder with an adjustable flow control passage.
- A mirror finish on the steel cylinder.
- No sliding seals, which makes the plunger rod on all Kinechek models move smoothly throughout the entire stroke.

Head over to www.deschner.com [1] to get more information on the Kinecheks.
