

## Detect 'Mass'-ive Leaks

**Vacuum Instrument Corp.** (Ronkonkoma, NY) introduces a new series of helium mass spectrometer leak detectors with touchscreen GUIs for testing the integrity of vacuum systems. The touchscreen allows for greater control and monitoring, along with easy calibration with the MS-60's built-in leak standard. Additional features include:

- A "Big Mode" that allows for viewing the panel at a distance.
- A System Diagnostic Mode that allows the operator to monitor several operating parameters, including crossover points, units of measurement, delays, and amp gain.

Visit [www.vicleakdetection.com](http://www.vicleakdetection.com) [1] to get more information on the leak detector.
