

Die Casting Ladles

Northern Iron and Machine (St. Paul, MN) is now offering an expanded line of replacement ladle cups and mounting brackets for most model die casting machines. The cups now come in eleven models with capacities from 0.44 lbs to 33.70 lbs. The replacement cups are heavy-duty, $\frac{1}{4}$ " ductile iron, and have contoured shapes for smooth pouring and resistance to metal build-up. A bolt-on design makes it easy to mount and tighten the bracket with minimal downtime. All the cups and brackets are manufactured in St. Paul with Northern's unique Versa Ram system.
