

## Get Comfortable With Lift Trucks

The **Hyster Company** (Greenville, NC) has launched a new series of lift trucks with lifting capacities of 55,000 to 70,000 lbs. The H550-700HD models are ideal for steel manufacturing, loading general cargo, and stacking loaded or unloaded containers. The newly designed models feature the ComforCab II operator compartment, which enhances operator comfort to maximize productivity. In addition, a new “Power-on-Demand” load-sensing hydraulic system allows fluid to be only pumped when the system is required to do work. This leads to a lower hydraulic oil temperature and extended life of filters, hoses, seals, and components.
