

Get The Right Angle

Kadant Solutions (Auburn, MA) has launched the AngleSet angle gauge tool for doctor blade and scraper installations. The new gauge is used to set the proper angle for improved doctoring performance and longer blade life. The AngleSet tool provides an accurate reading of the blade angle, and its compact design allows for flexibility in various applications, including creping, coating, drum flaking, and converting. Powered by a 3-volt battery, the angle sensor and microprocessor displays blade angles from 0 to 180 degrees.

Visit www.kadant.com [1] for more information on the AngleSet angle gauge tool.
