

Is It Hot, Or Is It Just Me?

Power Adhesives (Charlotte, NC) introduces a series of hot melt adhesive formulations, including a new Lost Foam adhesive, which is ideal where sand cores are fixed together and assembled. The adhesives bond instantly, without any wait time or use of solvents, which results in a reduction of scrap. In addition, Power Adhesives has a wide selection of glue guns, including the TEC 3200, 6100, and 810. The 3200 has a melt rate of up to 6.5 lbs/hour, with a built-in temperature control that makes the tool ideal for applications with different temperature requirements. The TEC 6100 has a controllable melt rate of up to 9 lbs/hour with twin stainless steel heaters and 500 watts of power.
