

Make Your Work Portable

Veto Pro Pac (Norwalk, CT) has introduced the Model LT-XL tool bag, which is designed to store and organize hand tools with two large zippered storage compartments and two padded storage slots. The LT-XL is built from a PVC-impregnated body fabric, which is then riveted to a 3mm injection-molded polypropylene base. The zippered and padded compartments can hold laptops and business paperwork, as well as a wide range of hand tools. The LT-XL was designed to allow manufacturing professionals to carry everything they need in a system designed to keep tools where they belong: in reach, and protected from real work site hazards.
