

## You Hold The Power

The Edison power distribution line from **AutomationDirect** (Cumming, GA) now includes the HPB-series open-style power distribution blocks as a convenient way to manage power distribution needs. The distribution blocks are manufactured with tin-plated aluminum connectors suitable for copper conduction, helping maintain a high SCCR rating of 200kA. With proper fusing, these blocks are suitable for both factory and field wiring. In addition, the blocks are available in single-pole or three-pole models, and 175A or 310A blocks.
