

## Be A Professional Designer

The MarkWare Lean Communication Software from **Brady** (Milwaukee, WI) can be used to quickly design professional signs, labels, and tags. The Lean Tools edition of the software helps manufacturers simplify machine setup and identify operation abnormalities through the use of visual equipment controls on gauges, oil sight tubes, drive train belts, and other machine components. According to the company, this can result in reduced downtime and enhanced equipment performance.

Check out [www.bradyid.com](http://www.bradyid.com) [1] for additional information on the software.
