

# Pressurized Tube Cleaning

The Saflex 3000 from **NLB Corp.** (Wixom, MI) is a semi-automated water jet system that cleans tube bundles more productively than manual methods and has wireless remote controls that let the operator stand clear of the action. The system can clean three tubes at once, on both the in and out stroke. Additional features include:

- The ability to clean 100 tubes in less than three hours.
- An operating pressure of up to 40,000 psi (2,800 bar) while simultaneously inserting three flexible lances into tubes with an X-Y positioning device.
- The capability to clean tubes from 4 to 15mm in diameter with a simple hose change.
