

## Prevent Forklift Heists

**Keytroller, LLC** (Tampa, FL) introduces a new 215 generation START-SMART keypad ignition system designed for tough conditions. No keys means no unauthorized, no untrained operators, and no “borrowing” of equipment. The START-SMART system replaces the ignition key with a sealed and potted keypad, which can also be RFID-enabled. In addition, the system is also available with an anti-theft wireless relay hidden in the ignition, starter, or fuel pump circuit, which prevents hotwiring. START-SMART can be manually programmed or synchronized with a database on a PC.

For additional information on the START-SMART system, visit [www.keytroller.com](http://www.keytroller.com) [1].
