

## Silicone: The Magical Adhesive

**The Dampney Company** (Everett, MA) is a one-part, room temperature vulcanizing (RTV) silicone adhesive/sealant for high temperature industrial applications. The ThurmaloX 2655 is 100 percent silicone rubber and cures to a tough, elastomeric sealant at room temperature while retaining permanent flexibility -80°F to 550°F. The sealant is also highly resistant to chemical attack, and is unaffected by moisture, weather, UV radiation, or ozone. ThurmaloX 2655 adheres well to most surfaces, including metals, painted substrates, ceramics, glass, rubber, and plastics.

Head over to [www.dampney.com](http://www.dampney.com) [1] to get more information on the adhesive.
