

Stay Safe, Green With PVC Mats

The Cushion Trax Ultra $\frac{3}{4}$ " anti-fatigue mat from **Superior Manufacturing Group** (Chicago, IL) is the latest addition to Superior's line of mats, which combine a durable vinyl top surface with a PVC foam base using the UniFusion bonding process, which eliminates the possibility of de-lamination, according to the company. The RedStop non-slip backing foam is used to eliminate slipping and sliding on smooth floor surfaces. The NoTrax mats are certified to ISO 9001 and 14001, and contain no silicone, ozone-depleting substances, or heavy metals. The vinyl top surfaces are made from 100 percent recycled PVC.
