

When Pressure Is A Good Thing

The **CS Hyde Company** now offers two high-performance films, Kynar and PEEK, which are available with pressure-sensitive adhesive. The KYNStick Tape is made with Kynar film and offers excellent chemical and corrosion resistance with a high tensile strength, according to the company. A good thermal stability and high purity make it a good candidate for food applications. In addition, the KYNStick tape does not wear out or get brittle, even in cold, heat, sunlight, and humidity. The PEEK Film has the best combination of purity, electrical insulation, low friction, and wear properties.
