

Finding The Best Angle

Metabo Corporation (West Chester, PA) now offers the 5" W11-125 Quick Compact Class Angle Grinder, which features a quick wheel change system that makes changing discs both safe and easy, without the use of tools. The W11-125 is ideal for cutting and grinding applications with a Vibratex side handle that reduces vibration up to 60 percent, lowering the risk of white finger syndrome, according to the company. Other features include a spindle lock button, auto-stop carbon brushes, and the Metabo "S-Automatic" safety slip clutch to help protect the operator from kickback. The W11-125 weighs 5.8 lbs but produces 1,100 watts of power.
