

LEGO-Like Crane Kits

Demag Cranes & Components (Cleveland, OH) offers pre-engineered single girder crane kits in either top running or under running configurations that allow installers to do their own on-site assembly. The kits are shipped with all necessary components except the steel beams. The kits feature:

- A wire rope hoist, end trucks, bridge panel, festoon system with brackets, and push button station.
- “Plug and play” assembly, meaning that no electrical work is required.
- Tight tolerances, which ensures trouble-free assembly, structural integrity, and longer service life.
- Capacities of 3, 5, and 10 tons.
