

## Betting Your Safety With A COBRA

The COBRA LIFELINK Single-Man cart from **Garlock Safety Systems** (Plymouth, MN) is a mobile anchorage system that one or two people can tie-off to when they're on an elevated job site by providing fall arrest for 1 worker and fall restraint for a second. The modular design fits almost anywhere. Other features include:

- A claw located under the unit that penetrates the substrate and holds the cart secure if a fall arrest occurs.
- Compatibility with a variety of substrates, including build-up roofs, PVC, EPDM, adhered plywood and hardboard, and 4,000 PSI concrete.
- A small size to make storage easy.
- Compliance with OSHA regulation 1926.502(d).
