

## For Cutting, Wavy Is Better

**Hyde Industrial Blade Solutions** (IBS, Southbridge, MA) has engineered a line of professional-grade blades, the Wavy Scallop Edge Blades, that combine the ability to cut tough materials with a longer blade life to outperform standard beveled edge blades. The new product can be used in numerous applications, such as cutting reinforced hydraulic hose or rubber belting. The Wavy Scallop blades feature sharp “points” at the leading edge of the cut, and scallops improve its cutting ability by providing single-point penetration into the work being cut.
