

## An Elevator Workstation

The new Elevation Station adjustable-height workstation from **Southworth Products Corp.** (Portland, ME) allows the user to raise or lower the tabletop, reducing fatigue and back strain. The unit features a foot pedal at each end of the base to initiate a smooth, precise transition to any height between 24" to 40". Additional features include:

- A 200-pound capacity.
- The ability for users to flip the 23.5" x 40" platform insert without tools, which also allows customers to use additional inserts made of other materials for special applications.
- A steel platform frame with an integrated 24-volt, internal linear actuator.
- A durable, scratch-resistant, hammertone finish.
