

Configurable Storage, Anywhere

Misumi USA, Inc. (Schaumburg, IL) has introduced a new line of Factory Frame Systems, meant to provide a configurable and cost-effective option for creating a wide array of temporary and permanent storage units. The Factory Frame system allows users to design, configure, and assemble units to meet their exact application requirements. Additional features include:

- A design that offers improved squareness at assembly.
- The ability to make fine adjustment to each separate frame without disturbing adjacent or completed frames.
- An aluminum alloy construction with a clear anodized surface finish.
- Saddles, inner caps, pipe stands, adjusting bolt sets, and casters as optional accessories.
